# Who Says Your Smile Can't Change The World?

Introducing Brava.

Not braces.

Not aligners.

**Independent Movers™**

Seems far fetched?  
Do your own research:

Brava™

# Straight Teeth In Months Not Years

## Brava is Fast and Efficient

Pre-programmed biomechanics move teeth on a direct path to each ideal position. Many cases can be completed in as few as four appointments.

## Brava is Always Active

Applies light and continuous force 24/7—and there are no trays to keep track of.

## Brava is Not Visible

Placed on the back of your teeth, Independent Movers™ work unseen throughout treatment.

## With Brava, There's Less Hassle

No wire changes, ever. Easier to floss than braces. Fewer appointments needed. Who says we can't invent a better approach to straightening teeth?

**Who says moving and adjusting teeth has to be awkward, inconvenience your life and take what seems like forever?**

Come on. We live in a world that puts more power in your hip pocket than what put humans on another planet. So there's no reason pre-programmed biomechanics combined with artificial intelligence can't straighten teeth in a fraction of the time associated with braces and aligners.

That's why we call them **Independent Movers™**. Never in human history have you had the opportunity to gain confidence so quickly.

## Moms prefer Brava over braces or aligners
